

**Are you expecting a new baby?**

**Does your baby have a family history of autism?**

## **Learn more about a clinical research study**

**Mothers of babies who have an increased family risk of Autism** are invited to take part in a trial of the **ENACT** program as part of a new University of Queensland research study.

### **What is ENACT?**

ENACT is an online intervention that harnesses the power of parents' everyday interactions with their babies to support infant development – and parents' own wellbeing – from the earliest months.

If you are **currently pregnant with a child who has a first-degree relative** (a mother, father, sister or brother) who has been diagnosed with **Autism (including Autism Spectrum Disorder or Asperger Syndrome)** you may be eligible to take part.

### **If you are interested in taking part, or to find out more:**

Please contact **Miss Kavindri Kulasinghe** or **Dr Andrea McGlade** (Chief Investigators) on **(07) 3069 7547**, email [uqenact@uq.edu.au](mailto:uqenact@uq.edu.au), or visit us at <https://qcprrc.centre.uq.edu.au/project/enact>
