

Early Family Support for First Nations Mums and Bubs with disabilities

Join a collaborative studies with First Nations Communities to provide Indigenous-led codesigned supports to families with a bub at high chance of neurodevelopmental disabilities

Why you should join us

The Strong Families Study is a statewide cohort of Indigenous caregivers and their babies, in partnership with Mater Research. PhD opportunities to work on the following projects:

- LEAP: Learning through Everyday Activities with Parents
- PACT: Parenting Acceptance and Commitment Therapy
- Indigenous Health workforce training and support
- Early screening and developmental trajectories for First Nations babies

Prerequisites

- A bachelor's degree in allied health (physiotherapy, occupational therapy, speech and language therapy or psychology), medicine, nursing, public health, social sciences – with the potential for scholastic success.
- Both Indigenous and non-Indigenous students are very welcome to apply
