Australasian Cerebral Palsy Health Network

Queensland Cerebral Palsy Research and Rehabilitation Centre

Support the mental health and wellbeing of adolescents with cerebral palsy — PhD opportunity

Why you should join us

- Contribute to research on adolescent mental health and wellbeing, with a focus on young people with cerebral palsy.
- Participate in co-designed research focused on translation
- Develop your specific PhD thesis around outcomes such as mental health, emotional regulation, adaptive functioning, social inclusion, and quality of life — taking into account your interests and experience.
- Develop core research skills in a supportive interdisciplinary research team.

Prerequisites

- Eligible for enrolment in a PhD (Master of Philosophy or Bachelor's degree from an approved university with at least honour class IIA or other relevant research experience).
- Educational background and/or experience relevant to the project (e.g., psychology, co-design, neurodevelopmental disability, adolescent development, or related fields).

AT A GLANCE

Potential for scholarship support for domestic students

Work with a leading, multidisciplinary, translational team

Participate in leading translational research
